PROFESSIONAL SUMMARY

In my first year as Front-end Developer at NEP, I was proud to participate in a great Agile frontend development team, customizing Material UI components for the Design System in Storybook from Figma Designs. I implemented React Components in the media app adding functionality. I just started to learn Typescript and writing Unit Tests. In my new role I love to grow as a creative developer in a cosy team.

CORE SKILLS

- ✓ HTML, CSS, SASS, Javascript, React
- ✓ Storybook, MDX files, Design Library
- ✓ Visual Studio Code, Webstorm, Terminal
- ✓ Back-end web development, Ruby on Rails
- ✓ Agile Software Development
- ✓ Jira
- ✓ Learning Typescript/ Unit Tests
- ✓ Git Version Control

EDUCATION

2021 - 2022 | Techgrounds

- Six months of reschooling in front-end development - HBO certified.

I was selected by Techgrounds, along with five other talented individuals out of 1500 applicants, to participate in a reschooling project aimed at becoming a frontend developer. The training program is at an HBO level. In order to be accepted, I was initially hired by NEP in Hilversum. Throughout this intensive six-month course, I gained proficiency in HTML, CSS/SASS, JavaScript, React.js, and GIT version control using command line.

1991- 1995 | Maastricht Institute of Arts - Fine arts

- Researching the purpose of superheroes, I imagined them as subversions of our personalities and projected them onto my closest friends. With oil paint I portrayed them on large canvasses. Later I use digitail painting mixed media scenes with the obsessed heroes walking through cities in decline.
-
